-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 July 2005.
 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

Applicant's election of claims 1-8 in the reply filed on 7/21/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Bone ('309).

Bone teaches the following claimed limitations as cited below:

1. (Currently Amended) A method for the monitoring of a manufacturing process of a plurality of physical objects, said method comprising the steps of :

Art Unit: 2813

performing an analysis by using values of at least one process parameter of the manufacturing process of the physical object (Col.5, lines: 10-30 and Col.6, lines: 30-45);

marking physical objects in such a way that the associated physical objects can be taken as a random sample for the monitoring of the manufacturing process when they satisfy a prescribed selection criterion (Col.6, lines: 10-20).

2. (Original) The method as claimed in claim 1, in which the physical object is a wafer (Col.6, lines: 10-20).

3.(Original) The method as claimed in claim 1 or 2, in which the analysis is a statistical analysis (Col.7, lines: 1-25).

4. (Original) The method as claimed in one of claims 1 to 3, in which the values of the at least one process parameter are measured when the physical object is being manufactured (Col.6, lines: 30-45).

5. (Original) The method as claimed in one of claims 1 to 4, in which the physical objects of the random sample are subjected to a quality checking measurement for checking the quality of the respective physical object. (Col.6, lines: 55-65)

6. (Original) The method as claimed in claim 5, in which, for ascertaining the variation of the qualities of the physical objects, a physical object for which the value of the at least one process

Art Unit: 2813

parameter has a prescribed difference from the random sample is additionally subjected to a quality checking measurement (Col.6, lines: 55-65).

7. The method as claimed in claim 1 or 6, in which the statistical analysis comprises the ascertainment of the median of the values of the at least one process parameter (Col.9, lines: 1-15- the median mean values would be the ideal processing conditions (threshold value), error values are compared against to determine whether outside deadband).

8. (Original) The method as claimed in claim 1 or 7, in which the statistical analysis comprises the ascertainment of the arithmetic mean value of the values of the at least one process parameter (Col.9, lines: 1-15- the median mean values would be the ideal processing conditions (threshold value), error values are compared against to determine whether outside deadband).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Laura M. Schillinger whose telephone number is (571) 272-1697. The examiner can normally be reached on M-T, R-F 7:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl W. Whitehead, Jr. can be reached on (571) 272-1702. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
